ENGINEERING & ARCHITECTURE

- Clean Code
- SOLID
- Design Patterns
- Code Review
- Mentoring

CMS & E-COMMERCE

- WordPress
- WooCommerce
- Elementor

TESTING & QUALITY

- E2E
- Unit Tests

LANGUAGES

- Portuguese Native
- English Fluent

Full Stack Developer with 5+ years of experience in software engineering, designing and building modern, scalable, and well-tested web applications. Current stack centered on React, Next.js, NestJS, TypeScript, GraphQL, and Prisma, with a strong foundation in system architecture, clean code, and SOLID principles. Comfortable across the full stack with focus on technical quality, maintainability, and continuous delivery of business value.

PROFESSIONAL EXPERIENCE

Mid-Level Full Stack Developer

JUL 2025 – MAR 2026

RUK Tecnologia

Software engineering for B2B SaaS products.

- Acted as technical owner of two platform products, driving decisions on system architecture, data modeling, and API design from inception through production delivery.
- Full stack engineering with React, Next.js, TypeScript, NestJS, GraphQL, and Prisma ORM, applying clean code, SOLID principles, and design patterns to ensure maintainable and scalable codebases.
- Built end-to-end features for SaaS products with critical external integrations, including messaging APIs and third-party services for corporate workflow automation.
- Implemented unit and end-to-end test coverage, raising overall coverage, reducing production regressions, and increasing confidence in continuous releases.
- Technical mentorship of junior developers and interns: code reviews, pair programming, code standards definition, and architectural guidance.
- Containerization and environment standardization with Docker on Linux hosts, ensuring parity between development, staging, and production.

- React
- Next.js
- TypeScript
- NestJS
- GraphQL
- Prisma
- TailwindCSS
- Docker
- Linux
- E2E Tests

Mid-Level Full Stack Web Developer

JUL 2024 – JUN 2025

AMDB Internet

Engineering of high-traffic editorial platforms.

- Engineering and maintenance of high-traffic web platforms, focused on scalability, high availability, and performance under load.
- Development of custom WordPress plugins and themes in PHP, with modular architecture, decoupled code, and emphasis on long-term maintainability.
- Design and integration of custom APIs powering critical editorial features and automated publishing workflows.
- Implementation of advanced technical SEO strategies and Core Web Vitals optimizations, driving organic traffic growth and improved search rankings.
- Administration and tuning of NGINX servers, including caching, I/O optimizations, and performance adjustments to handle high request volumes.
- Version control with Git/Bitbucket, containerized environments with Docker, and agile workflows using Kanban.

- PHP
- WordPress
- JavaScript

Web Developer

JUL 2022 – JAN 2025

Agência 3Grais

Development of web products and e-commerce platforms.

- Delivered 30+ projects across websites and landing pages, owning the full lifecycle from technical scoping to production deployment, with focus on

responsive design and performance.

- ▶ Development of custom plugins and admin dashboards in PHP/WordPress, with extensible architecture and code decoupled from specific business rules.
- ▶ Integration of RESTful APIs and dynamic features for WooCommerce-based e-commerce platforms.
- ▶ Continuous optimization of performance and technical SEO, including Core Web Vitals analysis, asset optimization, and caching strategies.
- ▶ Web infrastructure configuration with NGINX, Apache, and Cloudflare, focused on security, caching, and availability.

Technical Manager

NOV 2021 — JUL 2022

Agência Goolden Web

Technical leadership and development squad coordination.

- ▶ Technical leadership of a 4-developer team, responsible for code standards, technical reviews, and overall delivery quality.
- ▶ Implementation of CI/CD practices, deployment automation, and standardized version control workflows, reducing time-to-delivery.
- ▶ Definition of technical processes, backlog organization, and demand prioritization based on impact-effort analysis.
- ▶ Data-driven technical SEO strategies (Google Search Console, Analytics), including audits and information architecture corrections.
- ▶ Planning and execution of paid media campaigns focused on ROI and qualified traffic.

Front-end Developer

SEP 2020 — NOV 2021

Quality SMI

Front-end development of websites and web platforms.

- ▶ Development of dynamic, optimized websites in HTML, CSS, JavaScript, and PHP, focused on UX, responsiveness, and web standards.
- ▶ Optimization of front-end performance, with improvements in load time, asset optimization, and smooth navigation experience.
- ▶ Quick identification and resolution of bugs using debugging tools, ensuring stability and quality before deployment.
- ▶ Application of on-page SEO best practices directly during development, aligning semantic HTML structure with visibility goals.
